Open to relocation to the United States

Experience

- **Finapsys** March 2026 – July 2026
Software Engineer Santiago, Chile
 - Built and maintained backend and full-stack workflows in NestJS and TypeScript for hospital billing and insurer interactions across approximately 35 hospitals.
 - Built a returned-claims workflow that enables hospital teams to review and resubmit up to approximately 525 medical bills per day across the hospital network.
 - Built an accounts-receivable dashboard that automatically identifies bills exceeding insurer-specific payment deadlines, centralizing follow-up across approximately 35 hospitals.
 - Automated billing operations and data-processing workflows, including database ingestion, account resubmission, monitoring, and validation of production changes through Git and CI/CD.
- **Blackend** January 2025 – June 2025
Software Engineer Santiago, Chile
 - Designed, built, and deployed [Hereneo](#), a full-stack marketplace using TypeScript, Vue, Fastify, Node.js, and PostgreSQL, including payment processing through Mercado Pago and an administration dashboard.
 - Owned the product end-to-end, from client requirements and technical scoping through implementation, deployment, sprint coordination, and production delivery.
- **OPAL-RT STI** February 2023 – August 2023
Machine Learning Intern Lyon, France
 - Implemented and evaluated camera–LiDAR sensor-fusion algorithms for object detection in autonomous-vehicle simulations and integrated the resulting perception pipeline with vehicle-control models.

Education

- **Pontificia Universidad Catolica de Chile** March 2024 – December 2025
MSc in Engineering Sciences, Computer Science Santiago, Chile
 - Developed a Python/PyTorch pipeline for LLM fine-tuning and Direct Preference Optimization (DPO), including automated dataset construction, evaluation, and analysis.
- **Pontificia Universidad Catolica de Chile** March 2018 – December 2023
BSc in Computer Engineering Santiago, Chile
 - Major in Software Engineering; Minor in Data Science and Analytics.
 - Teaching Assistant for Data Structures and Algorithms, Software Engineering, and Discrete Mathematics.
- **INSA Lyon** August 2022 – January 2023
Academic Exchange Lyon, France
 - Coursework in Machine Learning, Data Analytics, Blockchain, and Secure Multiparty Computation.

Technical Skills

- **Programming:** Python, C/C++, TypeScript, JavaScript
- **Backend and application development:** NestJS, Node.js, Fastify, REST APIs, Vue, React
- **Data and infrastructure:** PostgreSQL, MongoDB, AWS, Git/GitHub, CI/CD
- **Core computer science:** Data Structures and Algorithms, Software Engineering, Data Processing
- **Machine learning:** PyTorch, Computer Vision, Sensor Fusion, LLM Fine-Tuning, DPO
- **Languages:** Spanish (native), French (C2), English (C1)
